

The Deck Clip™

(Patent Pending)

The ultimate solution in hidden Deck Fasteners.

Finally a hidden deck fastener that requires no pre-drilling, no messy adhesives, uses the strongest screw in the industry, holds the decking much tighter than the plastic clips and allows for the inevitable movement all deck wood experiences. Our unique fastener will cut your installation time in half!

What makes The Deck Clip™ special? Extruded out of 6063-T5 marine grade aluminum, The Deck Clip's™ unique shape allows it to grab both sides of the decking and actually hold it down like a miniature spring keeping your deck boards tight forever. The unique design works with all types of hardwood decking, whether pre-grooved or in biscuit jointer slots, and is the only one that works in our exclusive angled grooved decking. Add in a stainless steel screw that virtually eliminates stripped heads and you have a combination that can't be beat at a cost that is no more than the plastic clips.

Deck Clip installed in Cumaru decking. Note how the clip bows down holding both sides of the decking tight like a miniature spring.

Why Choose The Deck Clip™?

Installing hardwood decking presents plenty of challenges without having to fight pre-drilling for screws, messy construction adhesives, screws pulled thru the clip, stripped out screw heads or broken bits. The Deck Clip™ solves all these problems and gives you more strength and ease of installation than any other fastener on the market. Rounded edges ease installation and the lobes on the bottom grip the board and allow movement both ways. You will be amazed at how tight these clips hold and how fast they install.

ACQ Compatible!

The Deck Clip™ is manufactured out of the same grade of aluminum used on marine applications worldwide. Now the clips are also coated with a finish that makes them suitable for use with any decking material! Our clips have undergone a 2 coat process using Magni 599 corrosion resistant coating. This combination passed over a 1000 hour salt spray test, ASTM method B-117. You can be assured The Deck Clip™ will perform with any wood or composite!
